

iCandy Apple 2 Pear Multi-mode Pushchair

iCandy launches the Apple 2 Pear in seven NEW tantalising flavours.

In 2007, following years of British research and design, iCandy launched the world's very first modular system that could convert a one-seater pushchair to a two-seater pushchair and vice versa, all for the first time within a single footprint.

There had been singles that converted to large doubles before this date, but as a single they were still taking the footprint and unwieldiness of a double. Our innovation informed the creation of our iCandy Apple Pear collection which has now been superseded by our latest development, the new iCandy Apple 2 Pear.

As previously, the Apple 2 Pear seat unit is available in black with the option to add a flavour hood (sold separately), which now comes in a stunning new soft touch fabric with a choice of seven tantalising flavours; caviar, aniseed, raspberry blue, chilli, cookie, papaya and cassis.

The Apple 2 Pear pushchair is nearly 40% lighter than the original apple with no compromise to the functionality of the product.

The shopping basket is 11% larger and the Apple 2 Pear chassis features no-puncture EVA tyres. One of the main new benefits is the ability to fold without having to remove the seat unit.

Available to use from birth, the Apple 2 Pear single carrycot (sold separately) is suitable for overnight sleeping and comes with a padded mattress, raincover and washable liner. With the addition of infant carrier car seat adaptors (sold separately) the Apple 2 Pear is suitable for use with the Maxi Cosi Cabrio or Pebble and BeSafe iZiGo car seats.
